

Boston Government Services, LLC

BGS is an engineering, technology, and security firm providing mission-focused solutions for the clean-energy, nuclear, and federal programs markets. Application of our unique capabilities and experience in complex, secure, and highly regulated environments allows us to provide tailored solutions for each client's critical mission needs.

We are a solutions company.

We make a difference by providing expert services and effective technical and management solutions that meet our client's program needs and improve performance in mission-critical areas. Our experience and capabilities were developed through our success in complex, secure, and highly regulated environments. We leverage this experience and capabilities to provide innovative solutions tuned to each of our client's current mission needs and strategic direction.

BGS was established in 2007 to provide support attuned to the federal sector. Today, BGS is a "solutions company", delivering mission-focused solutions in the clean energy, nuclear, security, and government markets.

OUR SERVICES

PROGRAM MANAGEMENT & INTEGRATION

Mission-focused solutions for challenging government programs and complex federal projects.

We help clients plan and execute technical, scientific, and engineering programs and meet operational needs and performance objectives.

- Federal Program Support
- Project Planning & Management
- Program/Project Management Control Systems (PMCS)

INFORMATION SOLUTIONS

Our information technology capability delivers mission focused solutions to meet our client's business and field operation's requirements. We are experts in integrating unique systems and providing decision based, secure solutions to improve operational performance.

- Technology Alignment to Accomplish Mission
- Decision-Based Information Systems
- Enterprise Business Solutions

NUCLEAR ENGINEERING & SECURITY

Expert Solutions for development and protection of critical programs and infrastructure.

- Nuclear Safety
- Nuclear Criticality Safety
- Specialized Design Engineering
- Safeguards and Security
- Operations Support
- Quality and Compliance

OPERATIONAL CYBER SECURITY

Expert cyber security resources to assess our clients' needs and deliver fully compliant cyber security programs for highly regulated and complex environments.

- Cyber Security Programs Across All Environments: ICS/SCADA, IoT, Cloud, Enterprise/Business, and Classified
- Cyber Security Program Features
- Cyber Security Awareness Programs

CORPORATE INFORMATION

BGS FEATURES

- Quality of resources and solutions
- Expertise and innovation across key functional areas
- Solutions tailored for complex, secure, and highly regulated environments

EXPERIENCE HIGHLIGHTS

- Delivering Authorities to Operate (ATOs) across the DOE Complex
- Planning, integration, and R&D support for DOE's Energy Efficiency Program, contributing to our nation's clean energy future
- Nuclear Criticality Safety Center of Excellence
- Supporting DOE-EM in the development and implementation of a complex-wide Safeguards and Security Roadmap to guide program enhancement and consistency
- Developed and managing DOE's first cloud-based complex-wide transportation management system
- Specialized design engineering under our NQA-1 program

REPRESENTATIVE CLIENTS

- DOE Offices of Environmental Management (EM), Science, Nuclear Energy, and Energy Efficiency & Renewable Energy
- DOE National Nuclear Security Administration (NNSA)
- Oak Ridge National Laboratory
- Fluor-B&W Portsmouth, LLC
- URS | CH2M Oak Ridge, LLC
- Argonne National Laboratory
- DOE Oak Ridge Office
- Los Alamos National Laboratory
- Battelle Energy Alliance, LLC
- Fluor Idaho, LLC
- Oak Ridge Associated Universities
- Four Rivers Nuclear Partnership
- Tennessee Valley Authority
- N3B Los Alamos

Established: **2007**

Number of Personnel: **100+**

DUNS: **802853544**

CAGE: **4WTQ0**

Socioeconomic Status: **8(a)/SDB**

Locations:

- Oak Ridge, TN
- Washington, DC
- Golden, CO
- Piketon, OH
