

PROGRAM MANAGEMENT & INTEGRATION

Solutions for Challenging Technical, Scientific, and Engineering Programs

FEDERAL PROGRAM SUPPORT

Planning, integration, and operational support for Federal programs

- Program Planning and Management
- Technology (R&D) Analysis and Evaluation
- Financial Document and Budgetary Data
- Project Monitoring and Assessment
- Grant Application Evaluation and Selection Support, including Merit Review, Peer Review, Training and Technical Information Support
- Database Population and Maintenance
- Facilitation Services and Meeting Support

PROJECT PLANNING AND MANAGEMENT

Our integrated approach enables clients to satisfy requirements, improve performance, and achieve mission objectives

- Performance-based project planning and management
- Integrated Lifecycle Baseline Development and change control
- Customized, intuitive software solutions: Automation and integration to streamline processes, improve reporting and analysis, and improve flexibility to meet changing business requirements
- Software tools and data management solutions for project status information and better management decisions
- Integrated Cost Schedule Control Systems and Project Management Dashboards
- Risk Management
- Earned Value Management System (EVMS) Support per EIA-748
- Capital Asset Project Management per DOE O 413.3B

Boston Government Services, LLC

BGS delivers mission-focused solutions for challenging government programs and complex federal projects. Our blend of expertise, innovation, and experience translates to effective solutions tuned to our client's mission needs. We support cutting edge Research and Development (R&D) activities, complex operational activities, and critical federal programs.

We help clients plan and execute technical, scientific, and engineering programs and meet operational needs and performance objectives. Our integrated approach enables clients to satisfy requirements, improve performance, and achieve mission objectives.

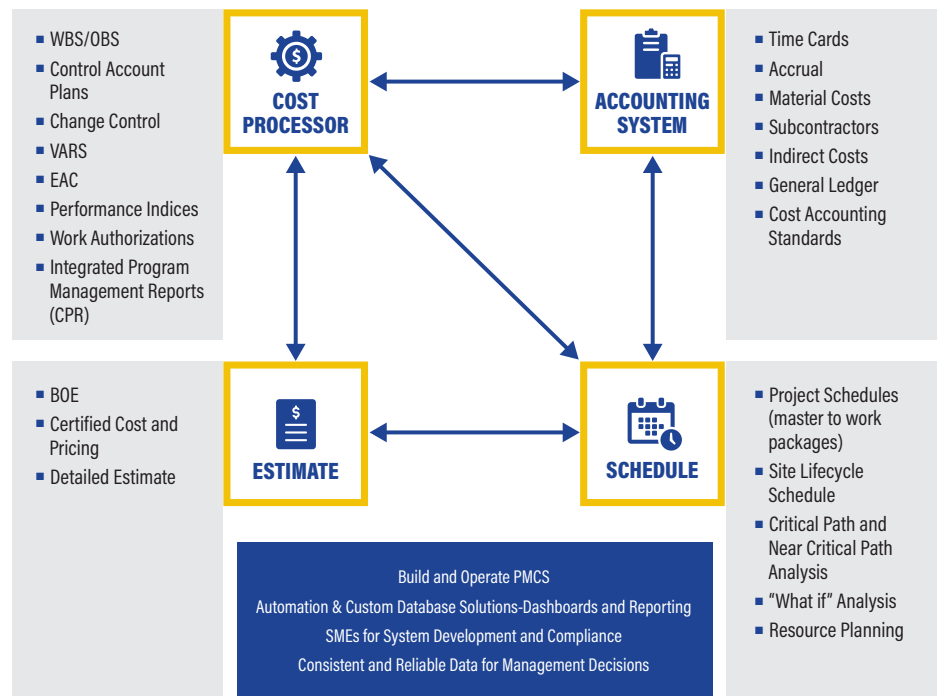

Experience Highlights

- Mission Oriented Technical Support (MOTS) services in support of the U.S. Department of Energy's, Office of Energy Efficiency and Renewable Energy (EERE) to support our nation's clean energy future.
- Providing the full scope of project controls and project support for the DOE Portsmouth D&D Project: baseline planning, development and change management, project controls and risk management, DOE O 413.3B documentation, EVMS implementation, and project management software.
- Developed customized, intuitive project management and project controls software solutions for large government contracts. BGS developed the EVMS WEBAPP for use at the DOE Portsmouth site. This EVMS application is a WBS linked file management system that becomes the management tool for the project and serves as the CAM's Notebook. The application creates reports from background file folder in the EVMS systems (Cobra, P6, Accounting, etc.) to support EVMS reporting and analysis.

INTEGRATED SOLUTIONS FOR SATISFYING REQUIREMENTS AND IMPROVING PERFORMANCE

PROGRAM/PROJECT MANAGEMENT CONTROL SYSTEMS (PMCS)

We integrate components, automate functions and reporting, enhance existing systems to satisfy requirements and improve performance, and develop and implement updated fully integrated systems.

EVMS Support: BGS provides subject matter experts (SMEs) in EVM per EIA-748 to support federal programs and project teams with implementation, compliance, certification, and surveillance.

Capital Asset Project Management: BGS personnel are experts in meeting the requirements of DOE O 413.3B for the acquisition of capital assets. We support both contractors and DOE Federal Project Directors (FPD) and Integrated Project Teams (IPT) in developing and maintaining the Performance Baseline, preparing Critical Decision (CD) documents, and supporting reviews. We develop Project Documentation (PEP, WBS, LCB, IPT Charters, etc.).
