

PROGRAM MANAGEMENT & IMPLEMENTATION

BGS provides the expertise and innovative solutions that support essential government programs, complex federal projects, and cutting-edge Research and Development activities. From strategy to operations, BGS enables the full life cycle of critical federal programs.

FEDERAL PROGRAM SUPPORT

Planning and Management

- Strategic Planning, Program Planning and Management
- Financial and Budgetary Planning
- Policy Development and Technical Oversight
- Regulatory and Policy Affairs
- Intergovernmental and Stakeholder Programs
- Internal and External Communications
- Project Monitoring and Assessment
- Interagency and International Collaborations

Operational and Technical Support

- Engineering and Technical Reviews
- Operational Assessments
- Quality Assurance and Software Quality Assurance
- Nuclear Safety Basis, Safety Integration and Management and ES&H
- Safeguards, Security and Emergency Preparedness
- Waste Management, Packaging and Transportation
- Cyber Security and Information Management
- Technology Programs

R&D PROGRAM MANAGEMENT AND SUPPORT

- Program Planning, Strategic Planning, Budget Development and Defense, and Financing Mechanism Support for Technology and R&D programs
- Engineering, Scientific and Technical Support
- Policy/Market/Technology Analysis
- Innovation and Technology Program Management
- Project Monitoring and Assessment support for National Laboratory Projects and Financial and Technical Assistance Projects
- Grant Application Evaluation and Selection Support, including Merit Reviews and Peer Reviews, Technical Training and Technical Information
- Internal and External Communications
- Interagency and International Collaborations

Boston Government Services, LLC

Solutions for Challenging Technical, Scientific and Engineering Programs

BGS scientists, engineers and technical professionals support challenging government programs in alternative energy, nuclear technology and operations, information security and the clean up of nuclear facilities.

From program planning and management to the implementation of technical and engineering solutions and cutting edge technologies, BGS partners with clients to enable mission success.

We are proud to support programs that contribute to our nation's energy independence, security, and competitiveness.

Experience Highlights

- BGS manages the \$112M Mission Oriented Technical Support (MOTS) contract for the DOE Office of Energy Efficiency and Renewable Energy (EERE). BGS provides the professional engineering, technology, and management capabilities EERE requires to manage the nation's \$2.8B annual investment in clean energy research, development, demonstration, and deployment (RDD&D) program and project portfolio to achieve the nation's energy, security, and environmental goals. Our energy engineers and scientists work in close collaboration with EERE to oversee over 1300 RDD&D active energy projects valued at \$2B. BGS leads a team of energy industry leaders to support this complex and vital mission for our nation.
- BGS leads the Consolidated Technical Support Services (CTSS) contract for DOE EM headquarters. We provide comprehensive technical support and subject matter expertise for Field Operations, Regulatory and Policy Affairs, and Corporate Services.
- BGS provides technical support and subject matter experts for DOE clean-up projects. At the Portsmouth D&D Project, we support baseline planning and change management, risk management, and EVMS certification and management. We support capital asset projects per DOE O 413.3B. BGS develops and supports customized, intuitive project management and project controls software.

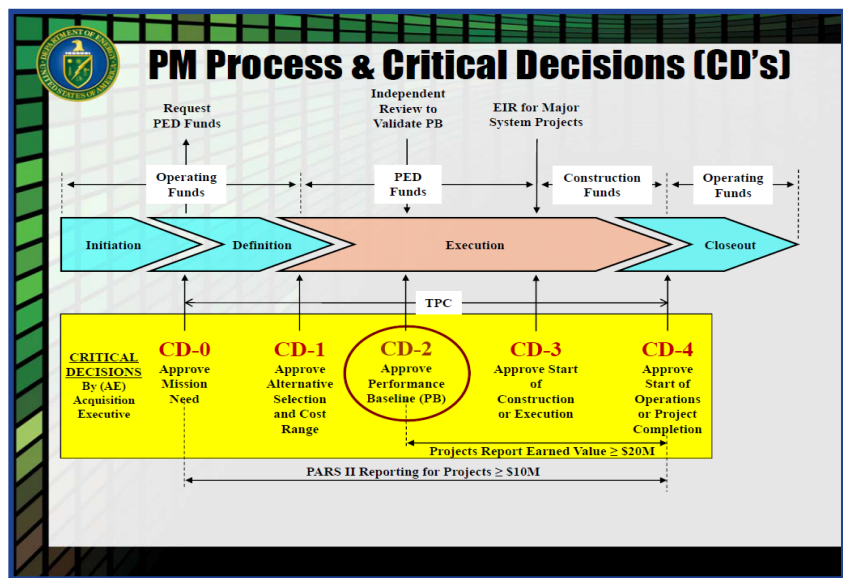

COMPLEX FEDERAL PROJECT SUPPORT

BGS provides an integrated approach that enables clients to satisfy requirements, improve performance, and achieve mission objectives. We understand complex, secure, and highly regulated environments and help clients plan, manage, and execute programs to meet requirements, operational needs and performance objectives.

- **Performance-based project planning and management:** Integrated Contract-Performance Baseline and Lifecycle Baseline Development, with change control, baseline management, Earned Value Management and Risk Management.
- **Customized, intuitive software solutions:** Automation and integration to streamline processes, improve reporting and analysis, and provide flexibility to meet changing business requirements.
- **Software tools and data management solutions:** Supporting project controls in analyzing the data and providing critical information for better management decisions, including Integrated Cost Schedule Control Systems (P6, Cobra, Cost Point, etc.) and Project Management Dashboards.
- **EVMS Support:** Providing subject matter experts in Earned Value Management per EIA-748 to support federal programs and project teams with implementation, compliance, certification, and surveillance.
- **Capital Asset Project Management:** Expertise in meeting DOE O 413.3B requirements for the acquisition of capital assets. We support contractors, DOE Federal Project Directors, and Integrated Project Teams in developing and maintaining the Performance Baseline, preparing Critical Decision documents (PEP, WBS, LCB, IPT Charters, etc.), and supporting reviews.

INTEGRATED PROJECT MANAGEMENT CONTROL SYSTEMS

BGS provides a blend of expertise, innovation, and experience to deliver effective solutions tuned to our client's mission needs. We integrate components, automate functions, expand reporting, and enhance existing systems to satisfy requirements and improve performance, resulting in fully-integrated systems needed to satisfy requirements such as DOE O 413.3B.
