

PROGRAM MANAGEMENT & INTEGRATION

We provide solutions for challenging technical, scientific, and engineering programs. We offer the expertise, experience, and innovation to deliver effective support and solutions for critical government programs, complex federal projects, and cutting-edge R&D activities.

Boston Government Services, LLC

BGS delivers mission-focused solutions for challenging government programs and complex federal projects. Our blend of expertise, innovation, and experience translates to effective solutions tuned to our client's mission needs. We support cutting-edge R&D activities, complex operational activities, and critical federal programs.

We help clients plan and execute technical, scientific, and engineering programs and meet operational needs and performance objectives. Our integrated approach enables clients to satisfy requirements, improve performance, and achieve mission objectives.

FEDERAL PROGRAM SUPPORT

Planning and Integration Support

- Strategic Planning, Program Planning and Management
- Financial Document and Budgetary Data Development
- Policy Development and Technical Oversight
- Regulatory Policy and Compliance Support
- Intergovernmental and Stakeholder Programs
- Internal and External Communications

Operational and Technical Support

- Engineering, Technical, and Operational Reviews
- Project Monitoring and Assessment
- NQA-1 Quality Assurance and Software Quality Assurance
- Nuclear Safety Basis, ES&H, Safety Integration and Management
- Safeguards, Security, and Emergency Preparedness
- Waste Management and Transportation
- Cyber Security and Information Management
- Technology Program Support

CUTTING-EDGE R&D PROGRAM SUPPORT

- Direct Scientific, Engineering, and Technical support for government and industry sponsored R&D activities
- Program Planning, Strategic Planning, Budget Development and Defense, and Financing Mechanism Support for Technology and R&D programs
- Policy/Market/Technology analysis
- Innovation and Technology Program Management
- Project Monitoring and Assessment support for National Laboratory Projects and Financial and Technical Assistance Projects
- Grant Application Evaluation and Selection Support, including Merit Reviews and Peer Reviews
- Technical Training and Technical Information
- Internal and External Communications
- Interagency and International Collaborations

Experience Highlights

- BGS manages the \$112M Mission Oriented Technical Support (MOTS) contract for the DOE Office of Energy Efficiency and Renewable Energy (EERE). BGS provides our federal partners the professional engineering, technology, and management capabilities required for EERE’s clean energy research, development, demonstration, and deployment (RDD&D) program and project portfolio to achieve the nation’s energy, security, and environmental goals. BGS’ energy engineers and scientists work side-by-side with our clients in EERE’s Washington, DC and Golden, CO locations. BGS assembled a world class team of energy industry and consulting firms to support this complex and vital mission for our nation.
- BGS leads the Consolidated Technical Support Services (CTSS) contract for DOE EM headquarters. We provide comprehensive technical support and subject matter expertise for Field Operations, Regulatory and Policy Affairs, and Corporate Services.
- BGS provides technical support and SMEs for the DOE Portsmouth D&D Project. We support baseline planning and change management, risk management, and EVMS implementation. We support capital asset projects per DOE O 413.3B. BGS develops and supports customized, intuitive project management and project controls software.

ENGINEERING | TECHNOLOGY | SECURITY

COMPLEX FEDERAL PROJECT SUPPORT

Our integrated approach enables clients to satisfy requirements, improve performance, and achieve mission objectives.

- **Performance-based project planning and management:** Integrated Lifecycle Baseline Development and change control, along with Earned Value Management and risk management.
- **Customized, intuitive software solutions:** Automation and integration to streamline processes, improve reporting and analysis, and improve flexibility to meet changing business requirements.
- **Software tools and data management solutions:** Supporting project controls and providing information for better management decisions, including Integrated Cost Schedule Control Systems and Project Management Dashboards.
- **EVMS Support:** Providing subject matter experts in Earned Value Management per EIA-748 to support federal programs and project teams with implementation, compliance, certification, and surveillance.
- **Capital Asset Project Management:** Expertise in meeting DOE O 413.3B requirements for the acquisition of capital assets. We support contractors, DOE Federal Project Directors, and Integrated Project Teams in developing and maintaining the Performance Baseline, preparing Critical Decision documents, and supporting reviews. We develop Project Documentation (PEP, WBS, LCB, IPT Charters, etc.).

INTEGRATED PROJECT MANAGEMENT CONTROL SYSTEMS

We integrate components, automate functions and reporting, enhance existing systems to satisfy requirements and improve performance, and develop and implement updated, fully-integrated systems.
